

FORK EXTENSION SLIPPERS

PRODUCT SPECIFICATIONS

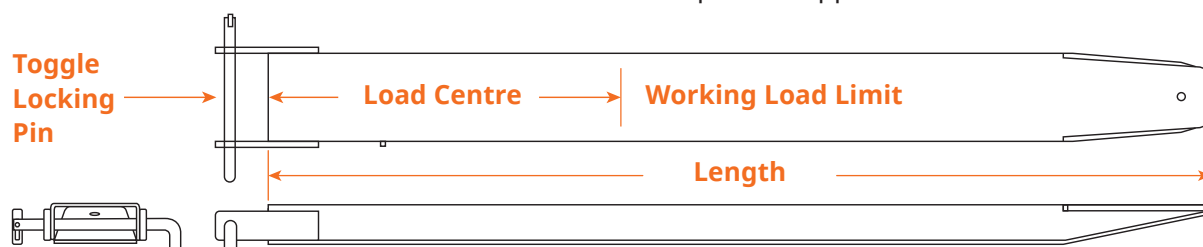

The Fork Extension Slippers are designed to extend the length of fork tines and versatility of your forklift truck. These slimline profile slippers are designed and manufactured in accordance with AS 2359.15.

Feature:

- Manufactured from high tensile steel
- Supplied with toggle locking pins for securing to forks
- Sold as a pair
- Fitted with rating plate and supplied with instructions
- Can be manufactured up to 16 T capacity on request
- Zinc finish

In accordance with AS 2359.15, slippers used for general usage should be no longer than 167% of the supporting tine length. If the slippers are longer than 167%, then the usage shall be restricted to their specified application.

SKU	Length (mm)	To Suit Max. Tine Size (mm)	To Suit Min. Tine Length (mm)	Unit Weight Per Pair (kg)	Horizontal C of G (mm)	Working Load Limit Per Pair @ Load Centre (kg @ mm)

EWFE4-30	3000	160 x 65	1800	221	1436	8000 @ 600	3200 @ 1500

Note: When Using Fork Extension Slippers all loads should be evenly distributed.

- EWFE1 series suits a maximum 100 x 45 mm fork size.
- For fork sizes above this (even if you have a 2.5T forklift), you must order the next size up. For example, a 2.5T forklift fitted with 125 x 45 mm fork size suits the EWFE2 range.
- Please confirm your dimension before order.
